# *CNRMA GIS Vision, Goals, Strategy*

## ***Vision:***

- *A Region that has readily accessible the geographic and asset information needed to make the best decisions in support of the Navy mission and operations.*

## ***Goals:***

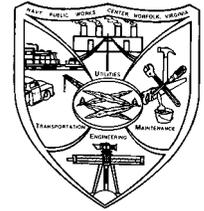

- *Standardize shore installation information for the Navy Regional Commander & all decision makers.*
- *Provide information electronically to all users regardless of skill level.*
- *Access information in real-time environment.*
- *One time data maintenance across the Region.*

## ***Strategy:***

- *Build from GIS efforts underway throughout NAVFAC*
  - *RSIMS, I2M, RSIP-link*
- *Implement current data as-is. Improve as funding available.*
- *Leverage technology. Limit customization.*

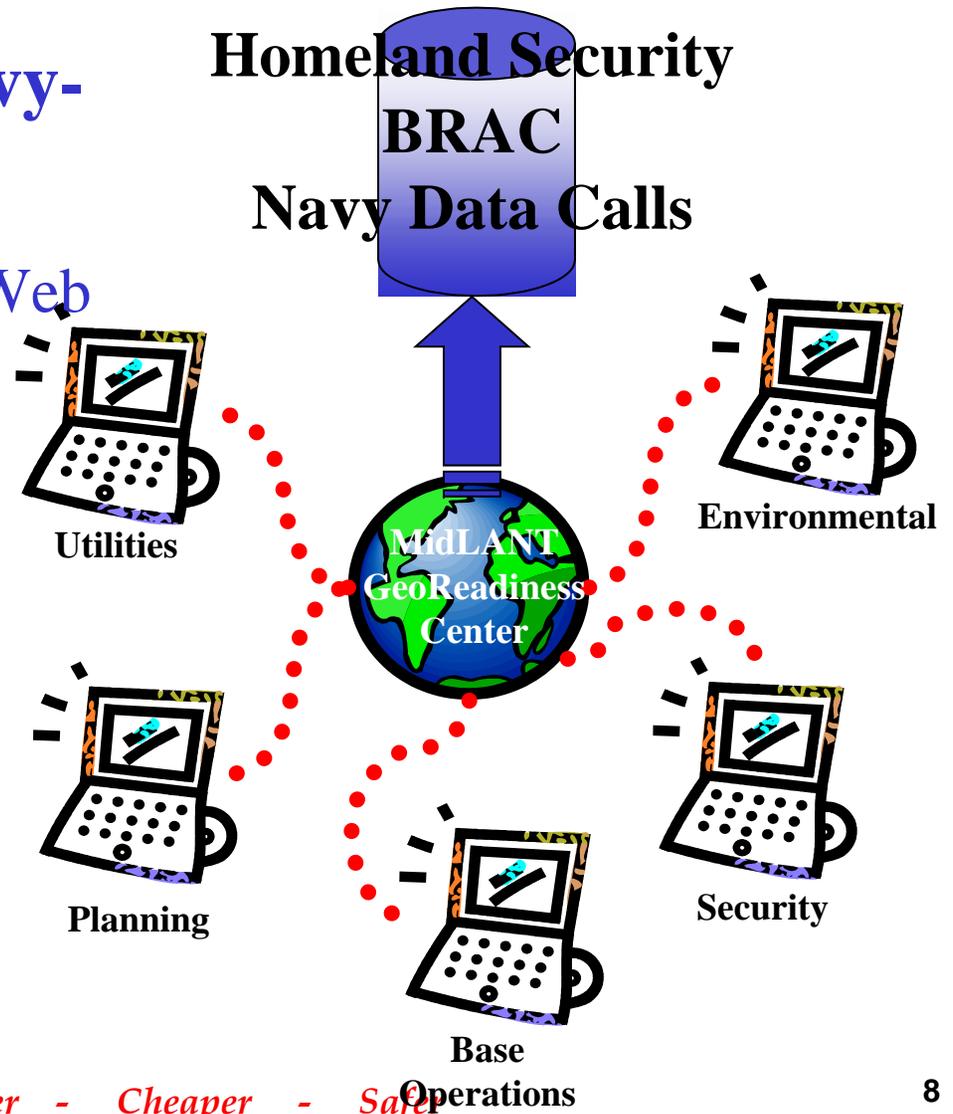

# Concept of Ops

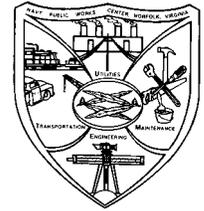

## Regional GIS feeding Navy-wide systems

- Use available technology & Web
- Eliminate redundant software
- One source for data
